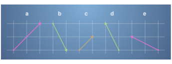
Doing some vector operations

TOTAL POINTS 7

1. This aim of this quiz is to familiarise yourself with vectors and some basic vector operations.

1 / 1 point

For the following questions, the vectors $\mathbf{a}$, $\mathbf{b}$, $\mathbf{c}$, $\mathbf{d}$ and $\mathbf{e}$ refer to those in this diagram:



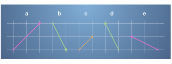
The sides of each square on the grid are of length 1. What is the numerical representation of the vector $\mathbf{a}$?

- ○ $\begin{bmatrix}1\\1\end{bmatrix}$
- ○ $\begin{bmatrix}2\\1\end{bmatrix}$
- ○ $\begin{bmatrix}1\\2\end{bmatrix}$
- ◉ $\begin{bmatrix}2\\2\end{bmatrix}$

✓ **Correct**
You can get the numerical representation by following the arrow along the grid.

2.

1 / 1 point



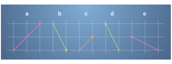
Which vector in the diagram corresponds to $\begin{bmatrix}-1\\2\end{bmatrix}$?

- ○ Vector $\mathbf{a}$
- ○ Vector $\mathbf{b}$
- ○ Vector $\mathbf{c}$
- ◉ Vector $\mathbf{d}$

✓ **Correct**
You can get the numerical representation by following the arrow along the grid.

3.

1 / 1 point

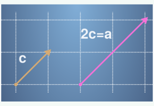


What vector is $2\mathbf{c}$?

Please select all correct answers.

- ☑ $\mathbf{a}$

✓ **Correct**
Multiplying by a positive scalar is like stretching out a vector in the same direction.



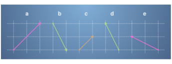
- ☐ $\begin{bmatrix}-2\\2\end{bmatrix}$
- ☑ $\begin{bmatrix}2\\2\end{bmatrix}$

✓ **Correct**
A scalar multiple of a vector can be calculated by multiplying each component.

- ☐ $\mathbf{e}$

4.

1 / 1 point

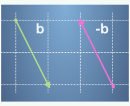


What vector is $-\mathbf{b}$?

Please select all correct answers.

- ☑ $\mathbf{d}$

✓ **Correct**
Multiplying by a negative number points the vector in the opposite direction.



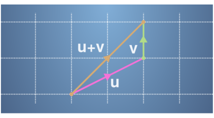
- ☑ $\begin{bmatrix}-1\\2\end{bmatrix}$

✓ **Correct**
A scalar multiple of a vector can be calculated by multiplying each component.

- ☐ $\mathbf{e}$
- ☐ $\begin{bmatrix}-2\\1\end{bmatrix}$

5. In the previous videos you saw that vectors can be added by placing them start-to-end. For example, the following diagram represents the sum of two new vectors, $\mathbf{u}+\mathbf{v}$:

1 / 1 point



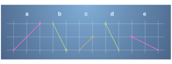
The sides of each square on the grid are still of length 1. Which of the following equations does the diagram represent?

- ◉ $\begin{bmatrix}2\\1\end{bmatrix}+\begin{bmatrix}0\\1\end{bmatrix}=\begin{bmatrix}2\\2\end{bmatrix}$
- ○ $\begin{bmatrix}1\\1\end{bmatrix}+\begin{bmatrix}1\\0\end{bmatrix}=\begin{bmatrix}2\\1\end{bmatrix}$
- ○ $\begin{bmatrix}1\\2\end{bmatrix}+\begin{bmatrix}1\\0\end{bmatrix}=\begin{bmatrix}2\\2\end{bmatrix}$
- ○ $\begin{bmatrix}1\\2\end{bmatrix}+\begin{bmatrix}0\\1\end{bmatrix}=\begin{bmatrix}2\\2\end{bmatrix}$

✓ **Correct**
We can see that summing the vectors by adding them start-to-end and adding up the individual components gives us the same answer.

6. Let's return to our vectors defined by the diagram below:

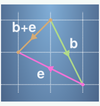
1 / 1 point



What is the vector $\mathbf{b}+\mathbf{e}$?

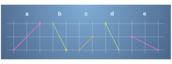
- ○ $\begin{bmatrix}2\\-1\end{bmatrix}$
- ◉ $\begin{bmatrix}-1\\-1\end{bmatrix}$
- ○ $\begin{bmatrix}1\\3\end{bmatrix}$
- ○ $\begin{bmatrix}-1\\2\end{bmatrix}$

✓ **Correct**
Vectors are added together entry by entry. They can also be thought of as adding start to end, like in the following diagram:



7.

1 / 1 point



What is the vector $\mathbf{d}-\mathbf{b}$?

- ○ $\begin{bmatrix}4\\-2\end{bmatrix}$
- ○ $\begin{bmatrix}2\\-4\end{bmatrix}$
- ◉ $\begin{bmatrix}-2\\4\end{bmatrix}$
- ○ $\begin{bmatrix}-4\\2\end{bmatrix}$

✓ **Correct**
Remember that vectors add by attaching the end of one to the start of the other, and that multiplying by a negative number points the vector in the opposite direction.

- ○ $\begin{bmatrix}2\\-4\end{bmatrix}$
- ◉ $\begin{bmatrix}-2\\4\end{bmatrix}$
- ○ $\begin{bmatrix}-4\\2\end{bmatrix}$

✓ **Correct**
Remember that vectors add by attaching the end of one to the start of the other, and that multiplying by a negative number points the vector in the opposite direction.
